

## Notes on Intervention Data

- Reading Recovery scores remain similar to previous years.
- BRP scores are better than in previous years.
- Scores for Phonics Counts are low. However this is only based on two children as we're now seeing a need for more comprehension interventions and phonics groups are taking place in every class right across school.
- Leicester Inference training showed the best improvements ever this year.

The teacher said this was reflected after the intervention in class.

- The key stage 2 Maths and Literacy groups show great progress and this was reflected in this year's UKS2 SATS results.
- Children have continued to make great progress on Bedrock vocab and Spellzone online individualised interventions. We have monthly reports from Bedrock vocab.
